

# Find & Check

*Bridging Blockchain Complexity with Analytical Simplicity.*

Project Pitch Deck · June 2023

FCK Foundation Project

# Introduction

**Find & Check is a comprehensive application built on the TON blockchain, offering a unique suite of analytical tools to TON network users.**

The platform aims to enhance user interaction with the blockchain, providing accurate project data, developing sophisticated tools for trend analysis, facilitating wallet and DEX operations.

***Created by the FCK Team, the project was launched on January 22, 2022, striving to simplify and streamline the blockchain navigation process.***

The screenshot shows the Find & Check mobile application interface. At the top, there is a large blue stylized TON logo icon. Below it is a header bar with the 'Find & Check' logo, a search bar, and three navigation links: 'Analytics', 'Events', and 'Road Map'. The main content area features several sections: 'Connect with us' (Facebook, Twitter, LinkedIn icons), 'Unlock Insights', 'Empower Decisions with TON Analytics', and a note 'Trade 87+ crypto tokens with TON using DeDust.io'. A prominent 'Get Started' button is located below these sections. To the right, there are two main sections: 'Trending' and 'Top Gainers'. The 'Trending' section displays nine tokens with their names and percentage changes: FCK (-2.55%), SCALE (-0.86%), LAVE (4.08%), BOLT (-1.61%), INC (0.00%), WEX (1.24%), KINGY (1.35%), TNX (0.38%), and JUSDT (0.04%). The 'Top Gainers' section displays four tokens with their names and percentage changes: LOVE (35.57%), GAIKA (8.22%), LAVE (4.08%), and KINGY (1.35%). Each token entry includes a small circular icon with a unique symbol and a green or red progress bar indicating its performance.

# The Team

*"We are a robust team of three dedicated and experienced individuals, each contributing their unique skillset and extensive knowledge in Full Stack development and management."*

**Beybut Abdulragimov**  
CEO, Senior Back-end Developer

*"Our collective expertise enables us to effectively address the challenges of blockchain interaction and deliver a solution that meets the needs of TON network users."*

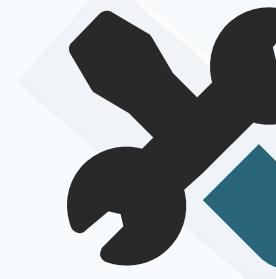

Find & Check

# Find & Check Objectives

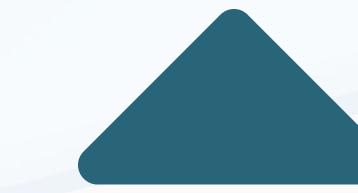

Our primary aim with **Find & Check** is to make the blockchain more accessible and valuable for users of the [TON network](#). To accomplish this, we've outlined several key objectives that align with our mission and vision for the platform.

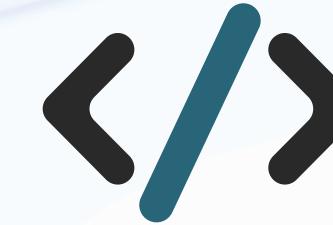

**Improving the interaction** of users of the TON network with the blockchain

**Improved tools** for trend analytics in the TON network

**Providing accurate** information about each project on the TON network

**Development** of tools for wallet and DEX operations

**Partnership** with Utility NFT collections to provide additional features

Find & Check

# Problem & Solution

**Problem:** Users of the TON network often struggle with blockchain interaction and third-party project verification. This complexity impedes seamless transactions and user experience.

**Solution:** Find & Check serves as a comprehensive tool for TON network users. It consolidates essential information and facilitates easy navigation of the blockchain. By providing accurate project information, robust trend analytics, and efficient wallet and DEX operations, Find & Check streamlines user experience and interactions with the TON network.

# Project Advantages

Our core strength lies in the distinct advantages we offer to our users. We have meticulously developed features that not only address the users' pain points but also provide unmatched benefits that contribute to an **enhanced user experience**:

- **Platform Independence:** Our app operates independently from other platforms, ensuring stability and reliability.
- **Comprehensive Tools:** Our web platform and [@FCKAnalyticsBot](#) provide users with in-depth blockchain interaction insights.
- **Telegram Name Generator:** Our [@FragmentCheckerBot](#) allows users to generate free Telegram names, adding unique value.
- **Continuous Adaptation:** We adapt and develop our project according to the evolving crypto market and community needs.
- **Community-Centric Approach:** The development of our project is a collaborative process involving our private community, ensuring user-centric growth.

*Our distinctive advantages place us at the forefront of blockchain interaction solutions, providing a superior, seamless, and intuitive experience for all TON network users.*

# Market and Competitor Analysis

The TON network space presents immense opportunities. With a clear understanding of our market and competition, we have positioned **Find & Check** to offer unique value to our target users.

- 1. Target Market:** Our primary target market is the rapidly growing user base of the TON network. These are individuals seeking intuitive and powerful tools for easy interaction with the blockchain, trend analysis, and wallet operations via any DEX.
- 2. Competitive Landscape:** Our comprehensive, all-in-one application concept, combining a unique set of analytics tools with integrated bot functionalities, distinctly sets us apart from the competition.
- 3. Competitive Edge:** Our strength lies in our focus on user needs and the ability to continuously develop and supplement our toolset, ensuring we remain responsive to market changes and user demands.

*As competition continues to grow, our unwavering commitment to user needs and continuous development ensures Find & Check stands out, ready to make a significant impact on the TON network market.*

# Business Model & Monetization

The sustainability of our project is rooted in a clear and viable monetization strategy. With a blend of user-centered services and strategic partnerships, we are **laying the groundwork** for a profitable and resilient business model.

- 1. Income Generation:** Revenue primarily comes from our bot services and platform's token voting mechanism.
- 2. FCK Token:** We have launched the FCK token, with a total issue of 300,000, adding a unique value proposition for our users and an additional revenue stream for our project.
- 3. External Funding:** In line with our plans for independent development and expansion, we are also open to external funding opportunities. This will accelerate our growth and increase our ability to innovate.
- 4. Partnerships:** Our collaboration with NFT collections like [Ton Diamonds](#), and ensuring liquidity of the coin through IDO, are integral parts of our growth strategy. These partnerships enhance our platform's capabilities and offerings.
- 5. Financial Projections:** Our financial indicators, including income, expenses, and profit, hinge on the successful implementation of our monetization strategies and the attraction of necessary funding.

# 2023 Roadmap

## Q1

- Audience engagement
- Token whitelisting
- Bot token integration
- DEX swaps contract addition
- Inclusion on DeDust.io whitelist
- Analytics tool creation
- Liquidity charts addition

## Q2

- Platform customization features
- System optimization
- Personal widget board introduction
- **Token integration into TON services**

## Q3

- NFT collection creation
- Collection presale for \$FCK holders
- Collection minting
- Stop limit order addition

## Q4

- NFT collection creation
- Collection presale for \$FCK holders
- Collection minting
- Stop limit order addition

# Find & Check

*Thank you for considering our project. We're excited about the potential of Find & Check and look forward to discussing how we can partner together for mutual success. We believe in the power of collaboration and are open to any feedback or questions.*
